Product information

insideONE+

A Full Windows 11 Braille tablet PC

Equipped with an Intel Core i7 processor.
Storage capacity from 256 GB to 1 TB.

Description

insideONE+ | **insidevision**

insideONE+ brings you the versatility of a tablet and the performance of a notebook. The combination of Braille, speech and visual feedback coupled with the Windows operating system, makes insideONE+ a must-have tool for students and professionals to get the job done right and do it independently.
Its portability, the connection with sighted people, the power of its i7 processor and its different connectors make it a universal tool.
The all-in-one Braille computer that follows you everywhere!

Advantages

A well-known environment

Reliable, powerful and scalable!

insideONE+ is powered by Windows 11, the most powerful and accessible OS for the visually impaired thanks to NVDA or JAWS screen readers. With insideONE+, take advantage of the power of Windows, a wide choice of pre-installed software, and the ability to add other software or peripherals without worrying about compatibility.

Innovation

insideONE+ is the Braille technical tool of the future, already available.
insideONE+ is a combination of notepad, computer and tablet.
An innovation: the tactile Braille keyboard with physical markings.

Braille users can write easily by simply typing on the screen, thanks to a patented innovation: the tactile Braille keyboard with physical markings.
To enable tactile identification of the keyboard, grooves on the screen surface.

This keyboard combines tactile technology with the sense of touch that is so intuitive for the visually impaired.

Quiet

The Braille keyboard is the quietest on the market!

The Braille keyboard does not interfere with visual screen reading. Select your braille table for input or output, uncontracted, computer or contracted braille.

Inclusion

A true help to inclusion, a new way of looking at blindness.

insideONE+ was created to ease inclusion by breaking down the barriers related to Braille understanding by sighted people (parents, teachers and their assistants, colleagues, spouses...).
No need for sighted people to learn Braille to use insideONE+.
All they have to do is look at the integrated screen.

If a sighted person wants to interact, there's no need to plug in a screen and keyboard! Just activate the virtual keyboard on the screen!

Portable, insideONE+ features a 10-inch screen that displays clear, legible content for sighted people, identical to what is displayed in Braille.

Design

Mainstream design: enjoy using a beautiful device.

The tablet's design is outstanding: insideONE+ looks like a regular tablet, using the same design codes and the same high-quality materials (anodized aluminum and Gorilla glass®).

Content, potential, productivity and entertainment...

insideONE+ is an open system.

Thanks to many on-board features, you can access to word processors, web browsers, e-mails, a file manager, an audio and video player and much more.

At any time, you can add new free or commercial applications to suit your needs. You can customize insideONE+ by adding productivity software, such as a Microsoft® Office licence (Word, Excel...), your cloud or e-mail accounts (Dropbox®, Gmail, Microsoft®, Apple®...), your music with a Spotify® or Deezer® account, or watch your series on Netflix® or other streaming services, watch YouTube®, use the localizer, stay connected with your favorite social networks...

Connect to your favorite libraries and enjoy reading your books on insideONE+. insideONE+ allows you to work together face-to-face, or remotely with a sighted person via a remote control tool, and with a blind person thanks to the screen reader tools.

At school, take notes, share documents with teachers, work with other students, find out the available information...

At work, connect to the company network and use the business productivity software. On the move, keep the same powerful tools and their power...

At home, improve your knowledge, stay informed and manage your day-to-day life with insideONE+...

Made in France

insideONE+ is a high-quality, reliable and sturdy Made in France® tablet.

3-year warranty!

Environmental features

In order to reduce its environmental impact, special attention has been paid in the design of the insideONE+ tablet to the use of recyclable and renewable materials. Over 70% of the weight of the insideONE+ is made up of aluminium, which is fully recyclable.
Stronger than plastic, this material provides greater protection and durability, while also allowing a more efficient heat distribution, avoiding energy-consuming fans.

Options

Braille Maths software

With Braille Maths, input mathematical expressions in Braille and print out the result, or send it in digital format to a sighted person. Braille Maths will carry out the transcription for you.

For the French-speaking market only.

Suite Home® software

With the Home® suite you can take notes, read books, make calculations and manage your files. An easy-to-use Braille interface, combined with a visual interface for sighted users, makes it easy to get familiar with this software.

You can switch on the fly from Home to Windows to go back to your other favourite applications. 50 tutorials are available on our YouTube channel.

JAWS screen reader

JAWS screen review software provides full text-to-speech access to the Windows environment, as well as to standard and specific software applications.

Compatible with the Windows interface, JAWS screen reader doesn't redefine its structure by allowing you to view this environment in the same way than a sighted person, making integration much easier.
